

Calculating quarterly instalment payments for 2016

- Use this worksheet to calculate quarterly instalment payments for an eligible Canadian-controlled private corporation (CCPC).
- To know if you are eligible to make quarterly instalment payments, see Guide T7B-CORP, *Corporation Instalment Guide*.
- Use the amounts you calculated on Worksheet 1 to complete the current-year information area on this worksheet.
- You can use the option that results in the least amount payable by instalments. Any remaining unpaid tax is payable on or before the balance-due day.
 - Option 1 – One-quarter of the estimated tax payable for the current tax year is due each quarter of the tax year.
 - Option 2 – One-quarter of the tax payable from the previous tax year is due each quarter of the current tax year.
 - Option 3 – One-quarter of the tax payable from the year before the previous tax year is due the first quarter of the current year. One-third of the difference between the tax for the previous tax year and the first payment is due in each of the remaining 3 quarters of the current tax year.
- We will charge interest if you use option 1 and the estimated tax is lower than the year's actual tax and the tax calculated using option 2 or 3.
- This schedule is a worksheet only and does not have to be filed with your *T2 Corporation Income Tax Return*.

Instalment payments are due each quarter of your small CCPC's tax year.
